

ALHUSSEIN ANWAR

Product Engineer

alhusseinanwer@outlook.com | +20 10 1055 9234 | 6th of October, Giza, Egypt | [linkedin.com/in/itsalhussein](https://www.linkedin.com/in/itsalhussein)

Product Engineer with 5+ years shipping production mobile products across fintech, enterprise, security, fitness, and consumer utilities. Combines deep native iOS expertise with Flutter and KMP/CMP delivery, REST and Firebase integrations, device features, production debugging, and App Store and Play Store releases. Experienced taking mobile surfaces from product intent through architecture, implementation, instrumentation, and release, including AI-powered task suggestions and analytics summaries.

CORE VALUE

- Product delivery: Cross-platform feature development, API integration, responsive UI, production debugging, analytics, and store lifecycle management.
- Native depth: Swift, SwiftUI, UIKit, CoreBluetooth, NFC, QR, HealthKit, background execution, push notifications, and deep linking.
- Architecture and AI: Clean Architecture, MVVM, shared business logic, Claude and LLM API integration, intelligent task suggestions, and analytics summaries.

EXPERIENCE

Senior Mobile Engineer Master Team

Jan 2024 - Present | Remote

- Led the KMP/CMP transformation of P+, S+, and Diwan, an enterprise portfolio, strategy, and project-management suite used across 13+ clients on iOS and Android.
- Architected shared business logic with Clean Architecture and delivered native iOS experiences while preserving clear boundaries between product logic and platform UI.
- Integrated LLM-powered task suggestions and analytics summaries; implemented Universal Links, custom URL schemes, deferred deep links, and AppsFlyer attribution.
- Supported product quality through XCTest and Kotlin Test, Instruments profiling, crash monitoring, store compliance, and App Store and Play Store releases.

STACK Swift | SwiftUI | UIKit | Kotlin Multiplatform | Compose Multiplatform | Claude API | REST | AppsFlyer | XCTest | Kotlin Test

iOS & Flutter Developer (Part-time) PDT Solutions

Feb 2024 - Feb 2026 | Remote

- Built the native iOS version of Digital Twin in Swift, integrating BLE/CoreBluetooth with external physical-access hardware and delivering NFC and QR access flows.
- Delivered an encrypted on-device wallet, real-time push notifications, and a secure in-app mailbox for the same identity and access experience.
- Shipped three Flutter products alongside native iOS work; integrated REST APIs, authentication, responsive UI, real-time alerts, and background execution for PDT Corporate and PDT Guard.

STACK Swift | SwiftUI | UIKit | Flutter | Dart | CoreBluetooth | NFC | QR | REST | Firebase | Push Notifications

EXPERIENCE (CONTINUED)

iOS Developer Expert Apps

Jan 2023 - Jan 2024 | Cairo, Egypt

- Built production iOS applications with Swift, UIKit, and RxSwift using MVVM and Clean Architecture across data, domain, and presentation layers.
- Engineered resilient REST integrations with pagination, retry, caching, and Realm persistence.
- Contributed to XCTest coverage, Fastlane and GitHub Actions CI/CD, production crash debugging, and performance profiling with Crashlytics and Instruments.

STACK Swift | UIKit | RxSwift | MVVM | Clean Architecture | REST | Realm | XCTest | Fastlane | Crashlytics

iOS Developer & UI/UX Designer Ultimate Solutions

Feb 2020 - Jan 2023 | Giza, Egypt

- Developed and maintained 10+ production iOS applications across fintech, fitness, enterprise, and consumer-utility products.
- Integrated HealthKit and deep linking; designed Figma flows and translated them into pixel-accurate UIKit experiences.
- Managed the App Store lifecycle, including provisioning, TestFlight distribution, review readiness, and production maintenance.

STACK Swift | UIKit | HealthKit | MVVM | REST | SQLite | Realm | Universal Links | Figma | TestFlight

SELECTED PRODUCT IMPACT

Digital Twin Secure digital identity and physical-access product. Built native Swift/CoreBluetooth integration for external hardware plus NFC/QR access, encrypted local wallet, push notifications, and secure mailbox features.

P+ / S+ / Diwan Enterprise KMP/CMP portfolio and strategy suite. Led the cross-platform transformation and shared-logic architecture serving 13+ enterprise clients.

Prayer Now Consumer Islamic application with 15M+ downloads. Contributed background notification delivery and analytics instrumentation at scale.

TECHNICAL SKILLS

Mobile: Swift, SwiftUI, UIKit, Objective-C, Kotlin, Android SDK, Flutter, Dart, KMP/CMP, Jetpack Compose

Architecture: Clean Architecture, MVVM, VIPER, MVC, BLoC, dependency injection, modular design

APIs & Data: REST, JSON, Firebase, Supabase, Realm, SQLite, CoreData, Keychain, pagination, caching

Devices & OS: CoreBluetooth, NFC, QR, HealthKit, CoreLocation, background sync, push notifications

AI: Claude API, LLM integration, intelligent task suggestions, analytics summaries, on-device ML

Quality & Delivery: XCTest, XCUITest, Kotlin Test, Fastlane, GitHub Actions, Instruments, Crashlytics, TestFlight, App Store Connect

Routing & Product: Universal Links, custom URL schemes, deferred deep links, AppsFlyer, Figma, responsive UI

EDUCATION

Postgraduate Diploma in Computer Science | Cairo University

Jun 2021 - Jun 2023

Bachelor of Civil Engineering | Al-Azhar University

Jun 2013 - Jun 2018

CERTIFICATION & LANGUAGES

iOS App Development Bootcamp - Udemy, Dec 2021 | **Languages** - Arabic (Native), English (Fluent)
